A: The best solution I found is to download uncracked file from the above link which is C:\Users\Mladen\Desktop\logitrace v14 full version after download it (saved it in some other directory (like C:\users\myname\desktop)) open cmd copy past this command C:\users\Mladen/desktop\logitrace v14 full version>unxor, bitor, cmp c:\windows\System32\drivers\etc\hosts all the files are copied to another directory from where you got the uncracked file (or to some other destination) try this command C:\users\Mladen/desktop\logitrace v14 full version>unxor, bitor, cmp c:\windows\System32\drivers\etc\hosts it will copy all files to another directory (or where you got the uncracked file) and the time it will finish is very long, so be patient :) if you get any error in this command C:\users\Mladen/desktop\logitrace v14 full version>unxor, bitor, cmp c:\windows\System32\drivers\etc\hosts you should not worry about it at all than you go to cmd and type in this command C:\users\Mladen/desktop\logitrace v14 full version>unxor, bitor, cmp c:\windows\System32\drivers\etc\hosts some files will be changed but you don't need to worry about this, than in cmd type in this command C:\users\Mladen/desktop\logitrace 3e33713323
